The Global Meeting Place for the Sulphur+Sulphuric Acid Industry

Transforming the Future - Connecting Markets, Advancing Technology, Driving Excellence

For over four decades, **CRU's Sulphur+Sulphuric Acid** conference has been the definitive gathering for professionals shaping the future of the global sulphur and sulphuric acid industry. Now in its 42nd year, this flagship event continues to set the standard for commercial insight, technical excellence, and unrivalled networking.

Bringing together more than **400 senior professionals** from over 42 countries, spanning producers, processors, technology innovators, traders and end-users, this is where the entire global value chain comes together.

In 2026, expect data-driven **commercial and markets outlooks** from CRU's leading analysts.

2025 Event in Numbers:

400+
Attendees

185+
Companies

66
Speakers

42
Countries

120
Producers

3
Days

Where Commercial and Technical Insight Converge

Seize new opportunities with commercial market outlooks from CRU analysts and industry thought leaders, a dual-streamed technical agenda addressing critical operational challenges, and troubleshooting clinics built around practical, solutions-led discussion.

Commercial Stream

Why attend?

This is the **premier forum for senior commercial leaders**, buyers, traders, analysts, and strategy teams across the sulphur and sulphuric acid value chain seeking for a meaningful business connections and a sharper view of the market and the commercial forces shaping it.

Why CRU?

CRU is uniquely positioned to provide the **markets intelligence that matters**. With leading experts, recognised forecasts, and direct access to the analysts shaping the view of the sector, this conference offers a level of insight and connectivity that is difficult to match elsewhere.

Attendees will gain:

- Independent insight into the latest market outlooks, price drivers, and trade flows
- A deeper understanding of supply-demand fundamentals, regional and global dynamics, premiums, and logistics constraints
- Strategic perspectives on burn vs buy, sourcing decisions, and market competitiveness
- High-value networking with peers across the global sulphur and sulphuric acid supply chain
- A trusted platform to support commercial decision-making and identify new business opportunities

Technical Stream

Why attend?

For technical professionals, operational leaders, process experts, and technology innovators, logistics and service providers seeking both practical learning and industry visibility, this is **the most relevant and credible platform** in the market.

Why CRU?

CRU convenes the **full technical value chain in one place**, creating a forum where operators and technology providers can exchange ideas, benchmark performance, and identify solutions.

Attendees will gain:

- Access to best practices in operations, reliability, troubleshooting, and emissions control
- Insights into plant design, revamping, safety, digitalisation, automation, and process optimisation
- Exposure to emerging technologies supporting efficiency, safety, sustainability, and decarbonisation
- Opportunities to connect with technology suppliers and peers through the buyers and sellers forum
- Practical knowledge that can help improve plant performance and strengthen long-term operational resilience

Commercial and Markets Programme

Connecting Markets, Forecasting Future Outlooks

Designed for Senior Leaders — Clarity Is a Competitive Advantage: Every element of the programme, from the **commercial and markets sessions** to the **executive networking** that surrounds them is built to deliver direct strategic value to **C-suite and senior commercial leaders**. For executives whose decisions shape multi-year capital commitments, access to an independent, data-led perspective, delivered by industry peers and analysts leading global coverage of the sector is invaluable.

Commercial and Markets Topics

Market Intelligence Briefing

- Global Sulphur Markets Outlook
- Global Sulphuric Acid Markets Outlook (Burn vs Buy)
- European Refineries - Regional market dynamics
- Supply and Demand Patterns - Strategic implications for producers and buyers
- Mapping Cost and Price Drivers
- Key Global Supply Sources

Economic and Regulatory Landscape

- EU Policies and Carbon Costs Update
- CBAM - Implication on fertilizer flow, sulphur and acid demand
- Understanding Premiums

Trade Patterns

- Changing Trade Maps
- Import/Export Deficits
- Market competitiveness
- Regional Markets Outlook – Producers and Buyers

Logistics, Supply Chain and Future Capacities Growth

- Resilience and New Projects: In focus - Germany and Central Asia
- Geopolitical, Logistics and Transit Risk Assessment

Commercial Value

- Understand current and future key drivers of supply and demand
- Gain direct access to CRU's leading analysts
- Structured and informal networking opportunities designed to connect you with the people and organisations that matter most to your business.
- Address your technology and engineering needs with a range of exhibitors
- Build relationships across the full sulphur and sulphuric acid value chain

Technical Programme

Advancing Technology, Driving Excellence

Designed for Technical Experts — Practical Solutions, Real-World Impact: From the technical sessions, discussions and to the networking opportunities the programme is designed to deliver practical value to operators, engineers and technology providers to share practical solutions and best practices for sulphur/sulphuric acid production, emissions, handling, efficiency and digitalisation.

Technical Topics

- Sulphur and sulphuric acid plants performance - catalysts and emissions
- Environmental compliance: Regulations, emissions monitoring and management
- Plant operations: Sulphur recovery processes - best practices, reliability, and troubleshooting
- Sulphur handling - safety, integrity, and innovation
- Energy transition, efficiency and sustainability
- Revamping for capacity increase
- Decarbonisation of the sulphur and sulphuric acid industry
- Sulphur and sulphuric acid plants - design and equipment
- Sulphuric acid, Oleum, Sulphur Trioxide
- Sulphur and Sulphur Dioxide
- Industry #4.0 - digitalisation, process control and monitoring, automation, instrumentation, and the use of AI

Technical Showcases

These sessions will highlight novel advancements in process intensification, digitalisation, and advanced materials, spotlighting innovations that will shape the industry's future. Explore cutting-edge technologies, challenges, real-world case studies, and breakthrough research.

Technical Value

- Share practical solutions and best practices in production, emissions, handling, efficiency, and digitalisation
- Learn about the latest developments in plant operations, reliability, troubleshooting, and safety
- Explore innovations in process control, automation, instrumentation, AI, and advanced materials
- Hear case studies on revamping, decarbonisation, and sustainability
- Address technical and engineering needs through the buyers and sellers forum
- Gain global visibility and position your company as a thought leader

2026 Troubleshooting Clinics

Day one of the Sulphur+Sulphuric Acid Expoconference will set the stage with a mix of technical expertise, forward-looking market intelligence, and networking.

The event will feature **two interactive Troubleshooting Clinics**, where seasoned professionals and newcomers alike will deep dive into real-world operational challenges in sour gas treating, sulphur recovery, and sulphuric acid production. Through these interactive sessions, we'll explore **common operational challenges, examine potential root causes, and collaboratively work toward practical solutions.**

Sulphur Clinic

Sulphur removal from sour hydrocarbons is crucial for limiting SO₂ emissions, while byproduct sulphur plays a vital role in creating valuable products. Both seasoned sulphur plant operators/engineers and those less familiar with the process will benefit from this workshop which aims to **address real-world challenges** encountered while operating or maintaining sour hydrocarbon treating, sulphur recovery, and/or **sulphur forming and handling facilities.**

Key Highlights

- **Expert-facilitated Discussions:** Engage in discussions on operational challenges and best practices with industry leaders
- **Open Exchange of Ideas:** Share your experiences, challenges and successes
- **In-depth Exploration of Hot Topics:** Discover a wide array of topics spanning the entire sulphur value chain
- **Networking Opportunities**

Sulphuric Acid Clinic

Sulphuric acid is the backbone of modern industrial chemistry — a critical input across sectors from fertilizers and pharmaceuticals to environmental control and metallurgical processing. Keeping production facilities running safely, efficiently and reliably is a challenge that demands both deep technical expertise and hard-won operational experience.

This interactive troubleshooting clinic is designed to meet engineers where they are. Whether you are a seasoned sulphuric acid plant operator with decades on the floor, or a process engineer looking to deepen your understanding of plant dynamics, this session offers something of genuine value. Facilitated by leading industry practitioners, the clinic **tackles real-world operational and maintenance challenges head-on**, spanning **sulphur-burning, metallurgical and regenerative sulphuric acid production facilities.** Expect candid, experience-led discussion, practical problem-solving and the kind of frank technical exchange that only happens when the right people are in the same room.

Testimonials

See below for first-hand accounts from last year's conference:

"It's very important for us as operators to be part of the conference because we can see all the technical providers gathered together. If we have a problem, we can have two, three possible solutions for these problems right here, technical expertise people. It is very useful for us to be here and also share experience from our side with our peers or other people from operational side."

Cristian Roempler, Operations Manager, Noracid

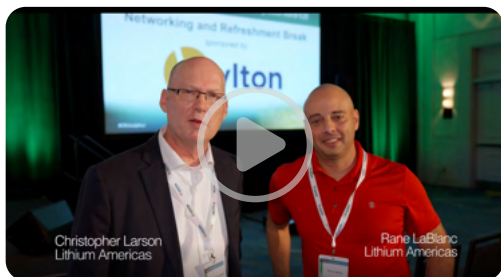

"At this conference you see the technology people talking to the operational people and together we find the solutions. We come here to exhibit and we sponsor this event to meet the people in the industry. The technology companies come here, the engineering companies come here, the supply chain people come here and the operating companies. So bringing that together in one room is awesome"

Frank Scheel, Business Development Manager, Worley Comprimo

"This event stands out as far as from other events and that really goes into the technical details of sulfur and sulfuric acid. It's nice to see that sharing happen in one location where a lot of people can actually bring different knowledge to the table. And we had different different companies, different expertise, different markets presented here in the conference today."

Christopher Larson, Senior Director of Global Operations & Rene LeBlanc, Vice President, Commercial & Product Strategy, Lithium Americas

Sulphur+Sulphuric Acid Expoconference

Want to profile your company?

We offer a flexible range of sponsorship and exhibition options meticulously designed to meet your specific marketing and business objectives and increase your company's exposure to the industry.

We can tailor packages to your exact requirements, ensuring your brand achieves maximum visibility and impact across all event touchpoints.

- **Connect with the People Who Matter** - Over three days of focused networking and strategic discussions, build meaningful relationships with the producers, traders, engineers and innovators who drive the global sulphur and sulphuric acid industry forward.
- **Put Your Brand in the Spotlight** - From headline event sponsorship to branding specific spaces, sessions or networking functions, we offer flexible, high-visibility opportunities to position your company exactly where your target audience is looking.
- **Engage, Demonstrate, Connect** - Take advantage of a rich exhibition experience that brings your products and solutions to life, giving your team the platform to interact directly with attendees, demonstrate capabilities and leave a lasting impression.

Sightseeing Tour - Monday, 2 November

Classic Berlin Tour – 13:00 - 17:00 (4 hours)

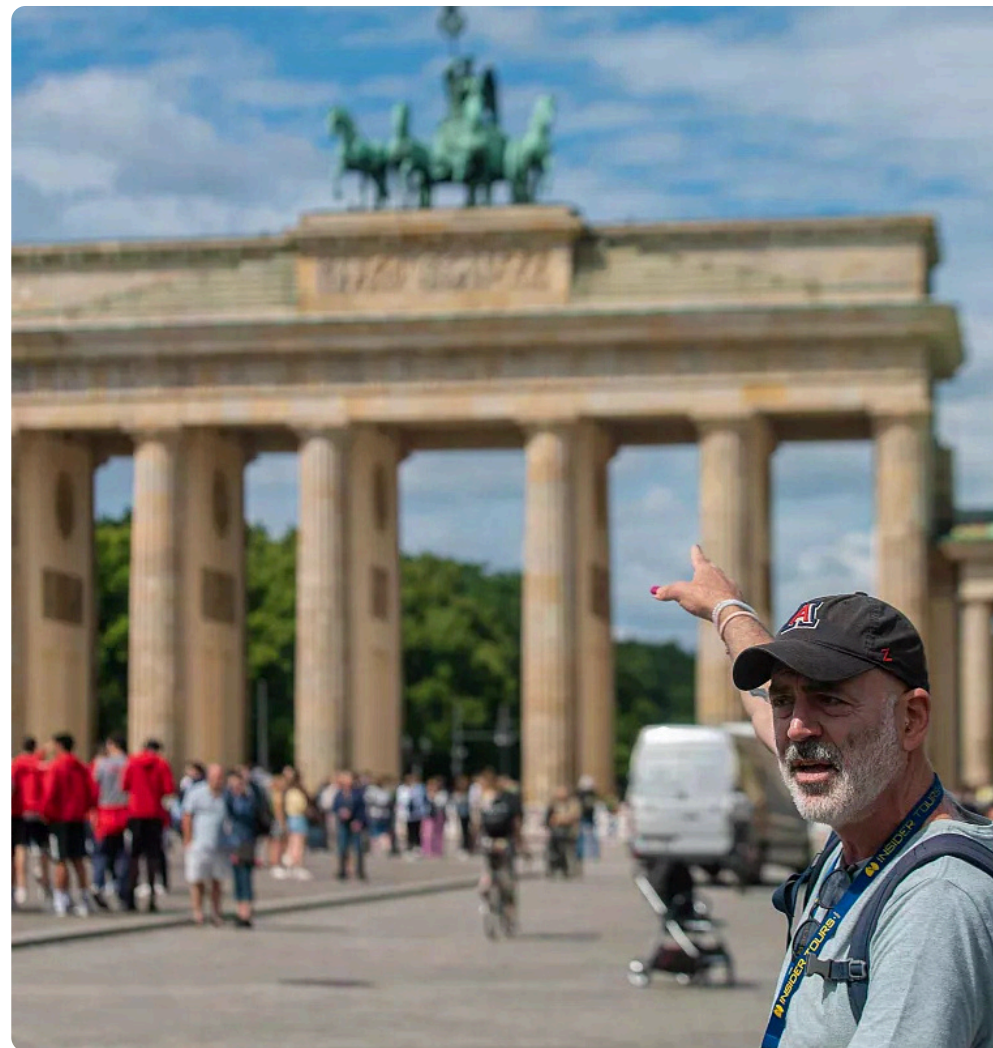

We have organised a sightseeing tour, open to delegates and any accompanying spouses/partners. This tour is tailor-made for our delegates and includes transportation to and from the Estrel Hotel.

About the tour:

Get an insider's look at Berlin, the capital and cultural centerpiece of Germany, on this guided walking tour. Visit some of Berlin's most popular attractions — like the Berlin Wall, Brandenburg Gate, the Reichstag, and Checkpoint Charlie — as well as a few lesser-known locations that many group sightseeing tours miss. Learn about the history of Berlin, from the time of the Prussian royal family to its role as capital of the Nazi Third Reich, to the divided city of the Cold War, to the modern-day capital of a unified Germany.

Price: EUR 43.60 per person

Please register and pay for the tour when completing your conference registration. Please note that we will not be able to refund the fee once your place has been confirmed.
